

# Third International Verification Methods Workshop

**FRIDAY -- 2.2.2007**

## **Session 7: Verification projects**

**Chairperson:**

**9.00 - 10.45** Groups

**10.45** **Coffee/Tea break**

## **Session 8: Verification applications**

**Chairperson:**

**11.15** Chiara Marsigli: Probabilistic verification at high-spatial resolution of the COSMO-LEPS limited area ensemble system

**11.30** Carlos Santos: Performance of the INM short range multi-model ensemble using high-resolution precipitation observations

**11.45** Julie Demargne: Verifying hydrological forecasts in the US National Weather Service

**12.00** Gulilat Tefera Diro: Seasonal forecasting of Ethiopian rainfall using SST

**12.15** John Gitutu: A comparative verification of precipitation forecasts for selected NWP models over Kenya

**12.30** **LUNCH**

## **Session 8: Verification applications (cont'd)**

**Chairperson:**

**2.00** Kristi Salonen: Bias estimation of Doppler radar radial winds

**2.15** Francis Schubiger: Verification of the COSMO LM 7 KM-version at MeteoSwiss and new developments for the 2.2 KM-version with a special emphasis on precipitation

**2.30** GianLuigi Liberti: Satellite based analysis of the capability of a climate model to reproduce short time scale cloud variability over the Mediterranean Area. Preliminary results: Summer 2000

**2.45** Christoph Zingerle: Satellite-based real-time monitoring and verification of model forecast clouds

**15.00 - 16.15 Final Remarks -- General discussion**

**16.15** **Coffee/Tea break**

**16.45 end of workshop**
